

BRIEF DESCRIPTION OF THE PROJECT

The project involves the basic but crucial functionality linked with the bank management system. The project allows the user to create an account in the bank or login using the existing credentials (IMAGE 1). A copy of the sample csv file used for the project will also be linked below. Upon clicking the “create an account” button (IMAGE 2) the user is required to enter the information as per the need of the program once done, the program will return the list of auto-generated credentials (IMAGE 3). After creation, the user can proceed to login to the account. If the login is successful, it will prompt you with a “Login successful” dialog box (IMAGE 4 AND IMAGE 5). After login, the screen displays various options to provide you with your banking experience (IMAGE 6). The screen shot of the utility of various options- accessing account details, changing details, withdrawing, or depositing money, FAQ’s, credit card generation and transaction history are attached in the second half of the file. Withdrawal or deposition of money requires the user to enter the credit card number. Once matched, you can proceed to withdraw or deposit money (IMAGE 15, 16, 17, 18). The user can also view the transaction history for current month, current year, and all-time history (IMAGE 19,20, 21, 22).

OUTPUT SCREEN SHOTS

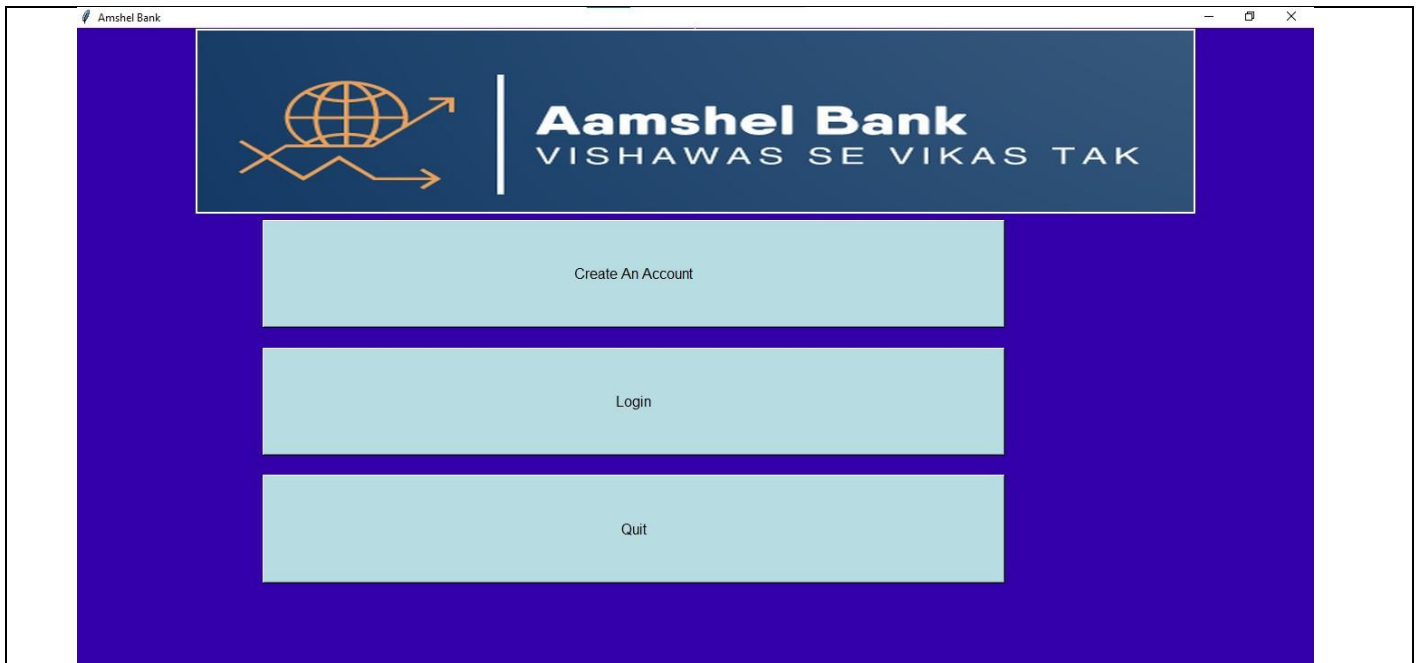

IMAGE 1

A screenshot of a web browser window titled "CREATE ACCOUNT". The page has a black header with the word "Register" in white. Below the header, there is a registration form with two columns of input fields. The left column contains labels for "Enter First Name:", "Enter Last Name:", "Gender:", "Enter Mobile Number:", "Enter Address:", "Account Type:", and "Enter Starting Amount:". The right column contains corresponding input fields, including a dropdown menu for "Gender" with options "Male", "Female", and "Other", and a dropdown menu for "Account Type" with options "Saving" and "Checking". At the bottom of the form, there are two buttons labeled "Submit" and "Quit".
